He meets Sherlock Holmes, a detective who just lost his wife. Lupin wants to assist Sherlock Holmes to find her murderer. They know that the will of the late Mrs. Watson, a woman who had only recently arrived in London, leaves a lot of money to her husband. Those who played the previous game (included in this collection) are aware of the game's strong pacing, brilliant puzzles, and complex story. The game is played in first-person, on a detailed map of London. Our investigative duo is in London on several occasions, each time to solve a specific case and complete a different stage of the main investigation. The puzzles are of medium difficulty. Yet sometimes the solution is found within only a few minutes. In the first game of this series, Sherlock Holmes took us to Victorian London where we met Sherlock Holmes, a retired detective who was forced to give up his career. He now lives alone and rarely leaves his flat, passing his days in his armchair and solving puzzles, both in real life and in his imagination. The mystery presented us with Sherlock Holmes's biggest challenge to date, because it involves a dead woman's body. But now, we have reached the Victorian era. It is 1883. Sherlock Holmes is in his retirement in his flat, while his old friend Arthur Conan Doyle returns to London from Edinburgh. He and Sherlock Holmes set out to find a person who has committed the crime of murder, and to present the case in their famous mystery novel. They have some information, but there is much that is unknown and unclear. We are not familiar with this crime or the person who committed it, so our only task is to find out what happened. The game is played in first-person, on a detailed map of London. We have a few free hours to solve this case and finish our task before the deadline of the end of the novel. The game has a strong pacing, with each stage of the main investigation and its various tasks being in turn not only a puzzle but also an adventure. There is a host of submissions, some of them interactive while others are a simple task to complete. The solution of each case in the first game of this series only took a few minutes, but with this second game, it took several hours. The puzzles were also more complex than before. The result was a real challenge, but it was also a fascinating experience. And finally, here is the solution to the first mystery 82157476af
